Research Interests -- My first experiences where in the interaction between Algebraic Topology and Category Theory, studying classifying spaces for categorical structures. Since then I have been applying categorical and topological methods in Differential Geometry, and in related areas such as Symplectic Geometry and Mathematical Physics. My research focuses in Lie groupoids, Lie algebroids and Differentiable Stacks, which provide both a unifying framework for classic geometries and a powerful language to develop new math.

Publications -- I have 12 published papers and 3 accepted in press. The complete list can be consulted in my [Google Scholar profile](#). My preprints are availabe in [arXiv](#). An up-to-date list of my coauthors is: G. Minian (UBA, Argentina), R. Fernandes (UIUC, United States), A. Cabrera (UFRJ, Brazil), H. Bursztyn (IMPA, Brazil), C. Ortiz (USP, Brazil), D. Stefani (Jussieu, France), E. Pujals (CUNY, United States), M. de Melo (UFSCar, Brazil).

Advising -- I co-advised the PhD Thesis of Mateus de Melo (IMPA, 2019) and advised the Master Thesis of Daniel Lopez (IMPA, 2017). I am currently advising the PhD Thesis of Juan Desimoni (UFF) and coadvising that of Dario Aza (UBA). I am supervising the postdoc researchers Cristian Cárdenans (UFF, 2018-) and Eduardo Velasco (UFF, 2019 -).

Teaching -- I have taught courses in Algebra, Analysis and Geometry, for undergraduate and graduate students.
